Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1781 Excerpt: .and do not exceed three degrees, or three hours., TABLE XVI. Is intended to facilitate the solution of the problem for finding the latitude of a /hip at sea, having the latitude by account, two observed altitudes of the fun, the time elapsed between the observations, measured by a common watch, and the sun s declination. The solution of this very useful problem, on these principles, was first invented by Mr. Cornells DotnueSs examiner, of the sea officers and plots by the appointment of the right honourable College of Admiralty at Am b sterdam, sterdam, about the year 1740. They were some time since transmitted by him to the Lords Commissioners of the English Admiralty; and Mr. Douwes was rewarded with 50l. by the Commissioners of Longitude. It has since been found that they may be usefully applied in the solution of other problems, for which...

### Reviews

*It is an awesome publication which i actually have ever read through. it had been writtern really properly and valuable. I found out this book from my i and dad recommended this pdf to discover.*

-- **Doyle Schmeler**

*This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.*
