## SOLUTIONS OF THE PROBLEMS AND RIDERS PROPOSED IN THE SENATE-HOUSE EXAMINATION (PAPERBACK)

To read **Solutions of the Problems and Riders Proposed in the Senate-House Examination (Paperback)** PDF, remember to click the button listed below and save the file or have accessibility to additional information that are in conjunction with SOLUTIONS OF THE PROBLEMS AND RIDERS PROPOSED IN THE SENATE-HOUSE EXAMINATION (PAPERBACK) ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1864 Excerpt: . is placed upon a rough curve in space, and subjected to the action of given forces. Find the least coefficient of friction consistent with equilibrium. A thin straight tube revolves with a given angular velocity about a vertical axis through its lower end, which is fixed, the inclination of the tube to that axis being invariable. Determine the condition of equilibrium of a particle placed at a given point within the tube, supposing it to be (1) smooth, (2) rough. Let  $\alpha$  = the inclination of the tube to the vertical axis,  $a$  = the distance of the particle from the axis,  $\omega$  the angular velocity. The effect of the rotation is to produce an acceleration  $w$  perpendicular to the axis, and from it, the resolved parts of which parallel and perpendicular to the tube are  $\omega a \sin \alpha$ ,  $\omega a \cos \alpha$ , respectively. Hence, if the tube be smooth, we have for equilibrium  $g \cos \alpha = \omega^2 a \sin \alpha$ ; and, if the tube be rough, in the state bordering on motion,  $g \cos \alpha - \omega a \sin \alpha = \pm n (g \sin \alpha + \omega a \cos \alpha)$ , the upper or lower sign being taken, according as the particle is on the point of moving down or up the tube; there,  $\mu \cos \alpha - \omega a \sin \alpha$  must be not less than  $J$ ,  $\mu \cos \alpha + \omega a \sin \alpha \geq 4$ . Investigate equations for the determination of the motion of a particle in one plane under the action of two...
