The truth is that we know very little about how it works. In recent years, scientists have begun to pay more attention to the brain. Studies have shown that there is health benefits derived from working crossword puzzles, because your brain needs regular playtime to form new patterns and complex neural networks naturally. Your mind requires nurturing just like your body. After all, exercise is not just about jumping jacks and free-weights; both our bodies and our minds need stimulation and exercise. Alzheimer s disease is a degenerative disease of the brain cells that results in memory loss. It leads to dementia that affects the functions of the brain associated with speech, language, decision-making, judgment, thinking, and perception. This condition is more common in people over the age of 65 and there is no known cure for it. The only method of treatment is slowing the progression of the disease, which can be partially achieved by exercising the brain by doing crossword puzzles. Crossword puzzles have proven to stimulate memory and possibly help the mind avoid Alzheimer s disease. They are also valuable in helping someone with Alzheimer s disease relearn some latent skills. Benefits of Working Crossword Puzzles Improves Cognitive Reserve Novelty and variety are crucial components of cognitive reserve - the brains ability to learn, and reserve what is learned, in the brain.
