MAPPING OF PARENT HAMILTONIANS: FROM ABELIAN AND NON-ABELIAN QUANTUM HALL STATES TO EXACT MODELS OF CRITICAL SPIN CHAINS

Springer. Hardcover. Book Condition: New. Hardcover. 220 pages. Dimensions: 9.7in. x 6.5in. x 0.8in. This monograph introduces an exact model for a critical spin chain with arbitrary spin S , which includes the Haldane--Shastry model as the special case $S=2$. While spinons in the Haldane-Shastry model obey abelian half-fermi statistics, the spinons in the general model introduced here obey non-abelian statistics. This manifests itself through topological choices for the fractional momentum spacings. The general model is derived by mapping exact models of...
